

SANDBLASTING CONTAINERS

- 2 fully equipped units for sandblasting-gritblasting-shotpeening operations

BLAST ROOM

2 fully equipped units for sandblasting-gritblasting-shotpeening operations.

Mobile and easy to use, the sandblasting containers C 205 and C 405 enable sandblasting/gritblasting/shotpeening operations in a closed and protected environment in compliance with the applicable standards. Secure and waterproof, they can be installed indoors or outdoors.

	C 205	C 405
Full length	7,10 m	13,25 m
Overall width	2,45 m	2,45 m
Overall height	3,85 m	3,85 m
Sandblasting useable area		
- Length	5,57 m	11,53 m
- Width	2,25 m	2,25 m
- Height	2,29 m	2,29 m

Description

- Doorway: Width: 2,10 m, Height: 2,20 m
- Steel floor
- Rubber coated walls, anti-abrasion
- Led lighting
- Side access door
- Safe access through magnetic sensors
- Sandblasting equipment with a 130 L capacity machine equipped with sandblasting hose, long venturi nozzle, helmet with panoramic visor and breathing air filtration

- Dust extractor with three-phase turbine 5,5 kW
- Airflow CE 5500 m³/h EC according to INRS recommendations
- Antistatic cartridge filter
- Automatic filter cleaning by means of pressure difference
- Dust collection bin
- 1 electric board with integrated management system enabling:
 - Setting the dust removing cycles
 - Filter clogging indicator

Energies to be provided

- Power supply: three-phase 6 kW 3P+N+T
- Compressed air: minimum 2 000 l/min (120 m³/H) at 6.5 bar

Options

- Recycling: 1 pneumatic vacuum cleaner directly adaptable on the technical unit and hopper extension positioned above the sandblaster

- Media cleaning lid

- 2 rows of anti-slip hinged gratings for work with round abrasive (glass bead type)
- Inside white rubber coating
